IOCOM

ADVANCED COLLABORATION | MADE EASY

EXPERIENCE LIMITLESS COMMUNICATION

IOCOM accelerates the experience of limitless communication by setting new standards in fully integrated communications, permitting you to observe content and context, and optimizing your ability to collaborate whenever, and wherever you choose to be.

Collaboration Made Easy

Our highly intuitive and customizable software delivers both ease of use and an unmatched collaboration experience.

Collaboration Everywhere

IOCOM allows everyone to participate. Our software securely links people, their computers, and their communication devices through communication networks, equally supporting people in auditoriums, conference rooms, offices, home offices, as well as those with laptop computers and other mobile devices. IOCOM supports all standards compliant products.

It's "As If You Are There"

Whether your need is ad hoc or scheduled, crises response or a regular process, one-to-many presentations or many-to-many discussions, IOCOM delivers a "like you are there" collaboration experience.

– Everyone can customize what is sent, received, and observed.
– Multiple views of close-ups and broader context can be sent and received everywhere.
– Full duplex audio is processed and every other participant's audio is adjustable.
– Every video and data stream is customizable, and viewable on a single monitor, or across multiple monitors / displays.
– All forms of content are transmittable.
– Lower bandwidth endpoints can participate without degrading other's experience.

Reliable & Scalable

IOCOM globally delivers best-in-class collaboration to ever changing groups of people through our secure internet friendly platform. We equally support individuals, small and large groups, and larger organizations. With IOCOM, participation is location independent as our software equally supports fixed locations, temporary locations as well as mobile users. IOCOM securely traverses firewalls and private networks. Our software integrates with standard load sets & existing support processes. We operate in either single or clustered server environments. Our products can be managed on-premises, offsite by outsource partners, or on a hosted (subscription or per use) basis by IOCOM.

Benefits – Simplicity & Results

Our customers report that we deliver the following benefits:

– Immediacy, and global inclusiveness accelerate results
– More relaxed, less-tiring, more productive collaborations
– Meeting and travel costs dramatically reduced
– Commodity off the shelf equipment (COTS) is lower cost and easy replacement
– Existing computers, networks, data centers, support infrastructure, and training are used avoiding duplication
– The number of devices in the communication chain is minimized
– Our ease of use extends to faster, cheaper installation and deployment, and lower efforts/ cost to operate and support

IOCOM in Action

We are an important part of many critical highly strategic processes for the worlds leading organizations, including:

– Distributed sales force management;
– Remote onshore and offshore exploration and production activities
– Deepwater exploration activities
– Emergency / Crises response processes
– Project management
– New medical treatment development / evaluations

IOCOM Chatback

"There are many conferencing and collaboration products to choose from, but few span from the conference room to the desktop. And only a few have the flexibility to bring computers, phones, and video-conferencing systems into a single environment. There are lots of unique capabilities pulled together in a single solution, perhaps because IOCOM has a different way of looking at the problem."
— Andrew Davis, Wainhouse Bulletin

"Using IOCOM software, it felt as if we were in the same room as the person interviewed in Chicago or in Manchester. It was natural and not tiring to talk for 90 minutes."
— Richard Line, VCInsights Newsletter

"IOCOM presence capability is the electronic equivalent of leaning out of your cubicle to ask someone a question."
– Elliot Gold, Chicago Tribune

IOCOM

A single solution for groups and individuals. A unified solution-set for conference rooms, offices, desktops, laptops and handhelds. A secure solution that interoperates with standards-based video, data, and applications

FEATURES AND FUNCTIONALITY

Some Common Features:
-Multiple video codecs including High Definition
-H323 Inter-operability
-Dial In / Dial Out PSTN
-Presence
-Firewall NAT Traversal
-Shared Whiteboard
-Application and Data Sharing
-Hardcopy Sharing
-Text Chat
-File Transfer

Some Unique Features:
-Software Operates on Ubiquitous HW and Networks
-Single Integrated Solution Room to Desktop
-Multiple Video Windows From an Endpoint
-Independent Selection of Video and Data Windows
-Independent Audio Controls at Each Endpoint
-Grid Enabled Server Software (or, Service) Scales
  to 1,000s of Users
-Full Motion Desktop Sharing & Recording
-Record and Playback of Complete Sessions
  (audio, video, and data)

FLEXIBLE SCALABLE SOLUTIONS

IOCOM's software takes video everywhere on networks, supporting mobile devices, laptops/personal computers, and large conference room users. The software safely navigates networks optimizing each users quality of service without the limitations inherent in equipment centric video conferencing. IOCOM gives network managers the ability to monitor, control, expand, and contract video traffic, and users the ability to interoperate with other prevalent equipment centric video devices .

For people on the go or in the field, IOCOM software keeps you connected. With bandwidth scalability on any network, people can connect anywhere, even over satellite or wireless data cards. Since IOCOM is a software solution, people can use handheld devices such as Ultra Mobile PCs or laptops.

For people that need to meet from specific locations, such as classrooms, laboratories, conference rooms or in the office, IOCOM software keeps you connected. Utilizing commodity off the shelf components, people can design an IOCOM solution that fits into their work area.

Wherever you are, IOCOM software keeps you connected. From drill ships or from a home office, an IOCOM solution brings people together. With transportable solutions, people can set up and connect easily from wherever and whenever.
